

Geometry Topics covered prior to Test #1

- Basic vocabulary and naming geometric figures
- Segment and Angle Addition
- Types of Angles
- Constructions
- Transformations
- Visual reasoning (Venn Diagrams)
- Inductive Reasoning (Patterns and Sequences)
- Deductive Reasoning (Explanations based on given facts)
- Conjectures and Converses
- Special angle relationships on intersecting lines and parallel lines w/ transversals
- Finding the slopes and equations of parallel and perpendicular lines
- Finding the midpoint
- Dividing a segment
