

**Polygon Sum and Exterior Angle Sum Theorem**

Directions: For each polygon, solve for  $x$  and  $y$ .

1.

2.

3.

4.

5.

6. This is a regular hexagon

7. This is a regular pentagon

8.

9. This is a regular heptagon.

10. An exterior angle of an  $n$ -sided regular polygon has a measure of  $60^\circ$ . How many sides does the polygon have?
