

**QUADRILATERAL  
MIDSEGMENTS AND  
PROOF DEVELOPMENT**

## BRAINSTORM

HOW DOES THE  
LENGTH OF A  
TRIANGLE  
MIDSEGMENT  
COMPARE TO THE  
LENGTH OF THE  
BASE?

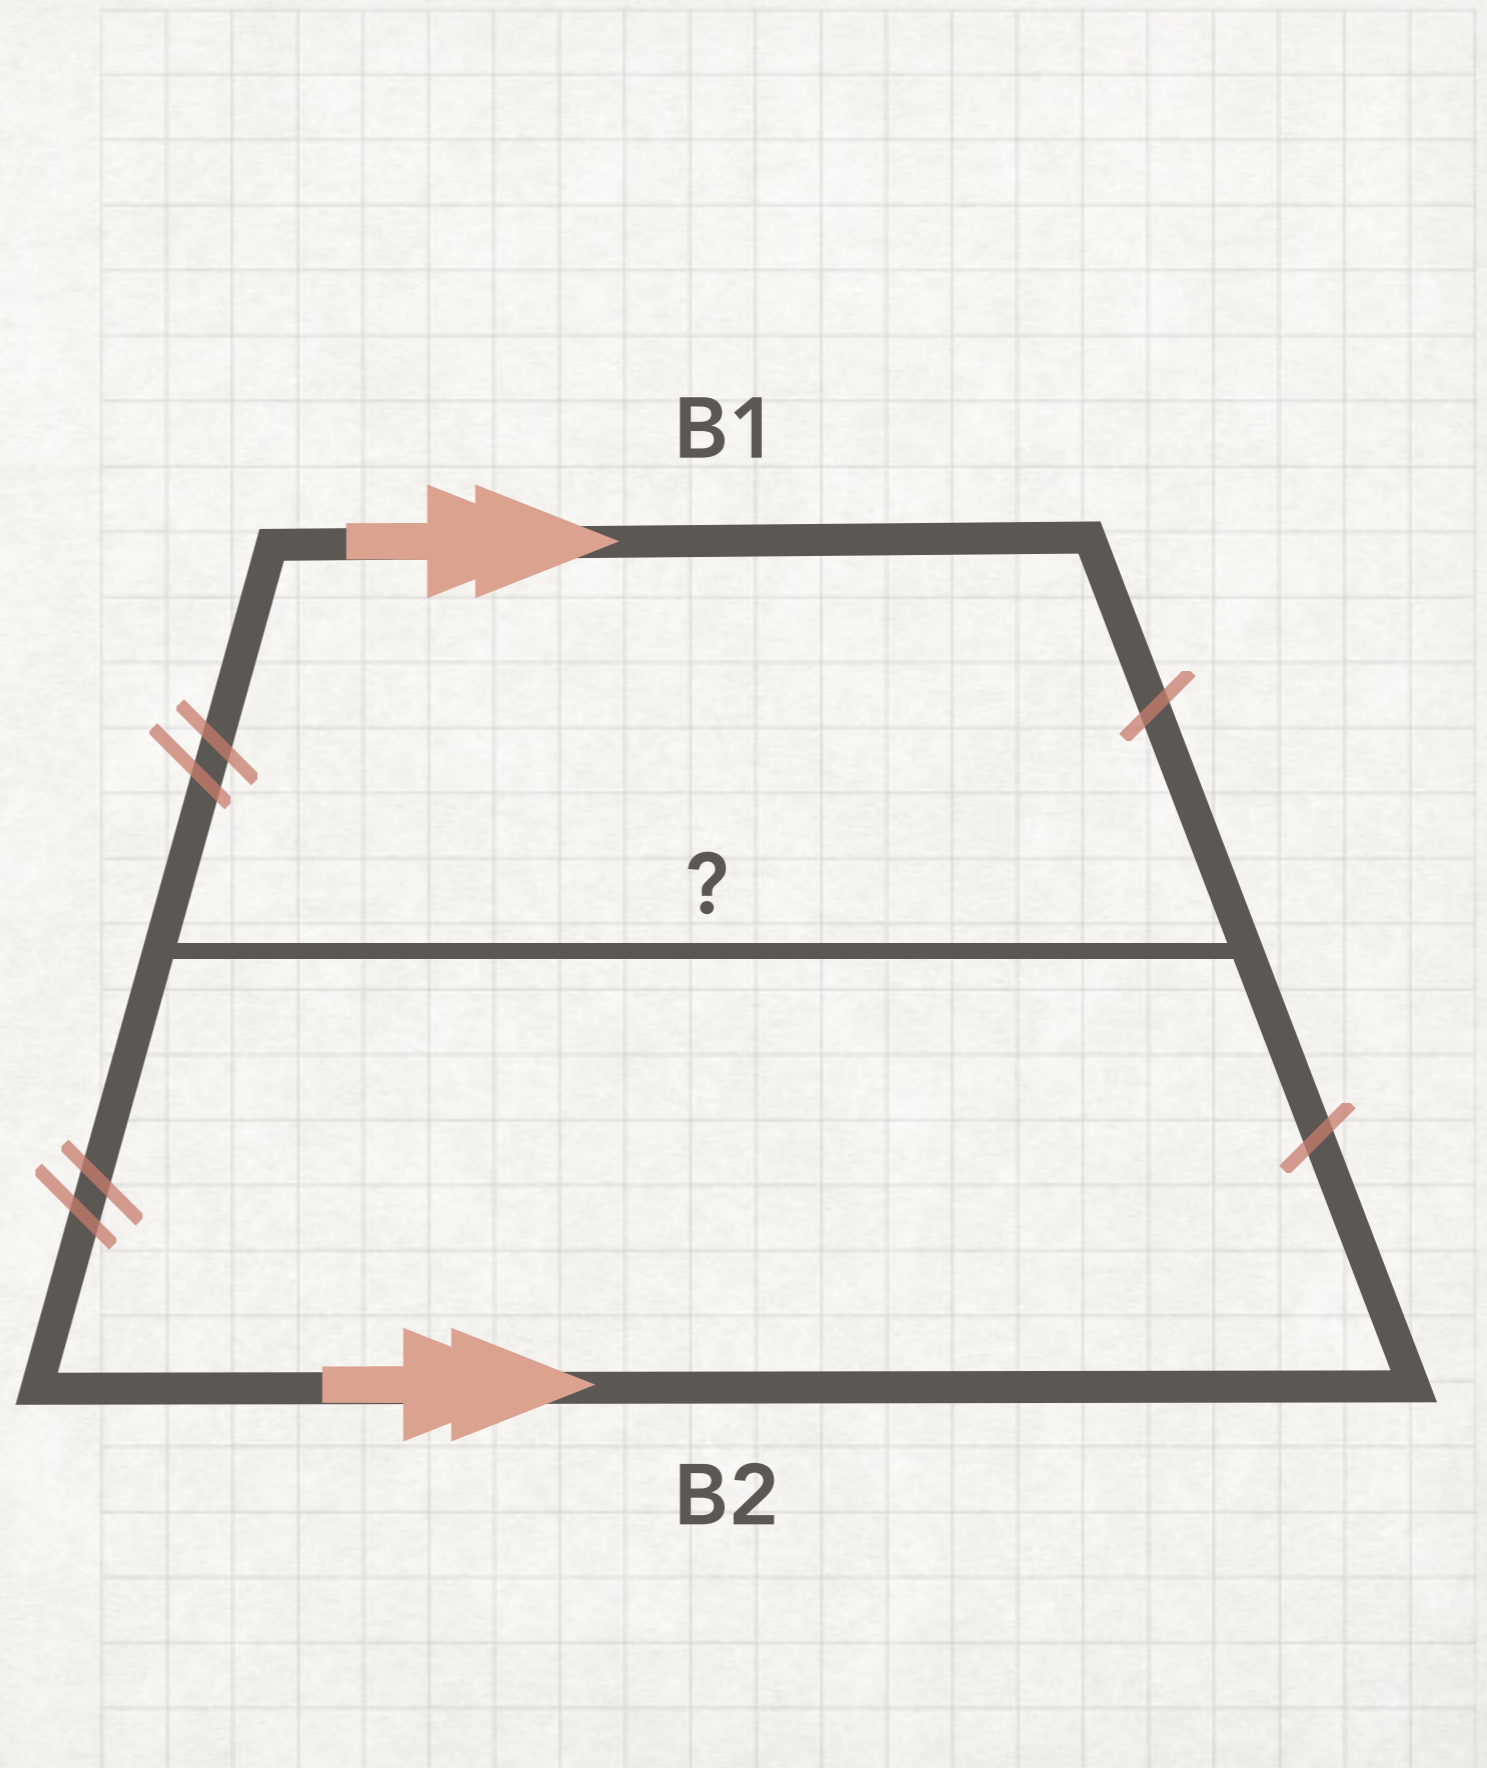

## BRAINSTORM

HOW DOES THE  
LENGTH OF A  
TRIANGLE  
MIDSEGMENT  
COMPARE TO THE  
LENGTH OF THE  
BASE?

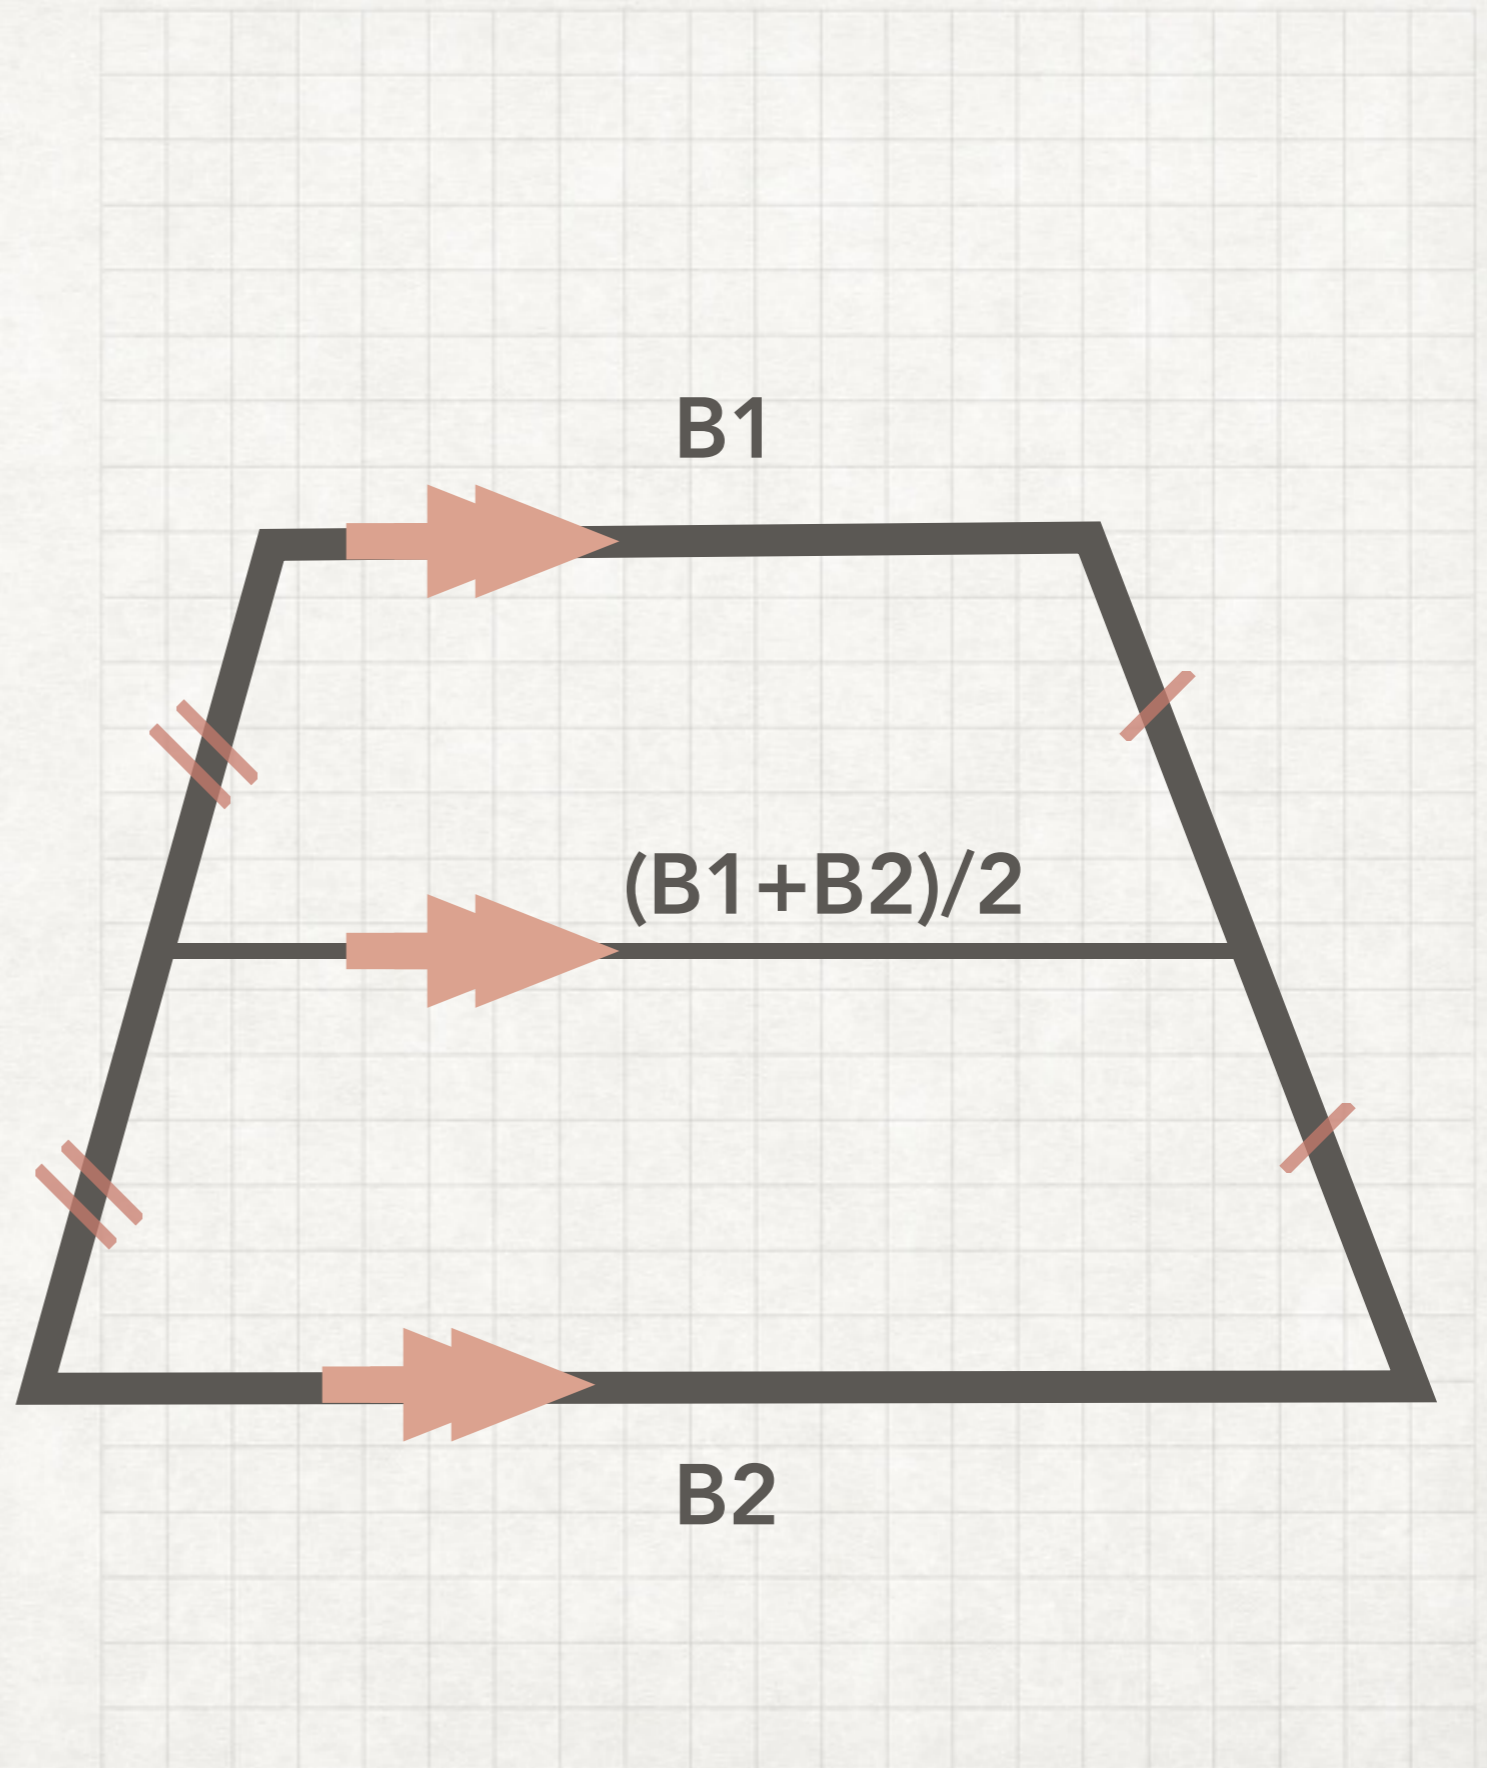

PREDICT

HOW DOES THE  
LENGTH OF A  
TRAPEZOID  
MIDSEGMENT  
COMPARE TO THE  
LENGTH OF THE  
BASES?

PREDICT

HOW DOES THE  
LENGTH OF A  
TRAPEZOID  
MIDSEGMENT  
COMPARE TO THE  
LENGTH OF THE  
BASES?

# PROOF DEVELOPMENT: BACKWARDS DESIGN

## EXAMPLE

**Given:** Dart  $ADBC$  with  $\overline{AC} \cong \overline{BC}$ ,  $\overline{AD} \cong \overline{BD}$

**Show:**  $\overline{CD}$  bisects  $\angle ACB$

# PROOF DEVELOPMENT: BACKWARDS DESIGN

## EXAMPLE

**Given:** Dart  $ADBC$  with  $\overline{AC} \cong \overline{BC}$ ,  $\overline{AD} \cong \overline{BD}$

**Show:**  $\overline{CD}$  bisects  $\angle ACB$

STEP 1: START WITH WHAT YOU WANT TO PROVE

BRAINSTORM WHAT YOU WOULD NEED IN THE FINAL STEP OF YOUR PROOF TO PROVE IT

“I can show  $\overline{CD}$  is the bisector of  $\angle ACB$  if I can show  $\angle ACD \cong \angle BCD$ .”

$\angle ACD \cong \angle BCD$

$\overline{CD}$  is the bisector of  $\angle ACB$

# PROOF DEVELOPMENT: BACKWARDS DESIGN

STEP 2: MOVE BACKWARDS FROM THE FINAL STEP

“I can show  $\overline{CD}$  is the bisector of  $\angle ACB$  if I can show  $\angle ACD \cong \angle BCD$ .”

$$\angle ACD \cong \angle BCD$$

$\overline{CD}$  is the bisector of  $\angle ACB$

“I can show  $\angle ACD \cong \angle BCD$  if they are corresponding angles in congruent triangles.”

$$\triangle ADC \cong \triangle BDC$$

$$\angle ACD \cong \angle BCD$$

$\overline{CD}$  is the bisector of  $\angle ACB$

# PROOF DEVELOPMENT: BACKWARDS DESIGN

STEP 3: KEEP MOVING BACKWARDS  
UNTIL YOU REACH INFORMATION  
YOU'RE GIVEN

“I can show  $\angle ACD \cong \angle BCD$  if they are corresponding angles in congruent triangles.”

$$\triangle ADC \cong \triangle BDC$$

$$\angle ACD \cong \angle BCD$$

$\overline{CD}$  is the bisector  
of  $\angle ACB$

“Can I show  $\triangle ADC \cong \triangle BDC$ ? Yes, I can, by SSS, because it is given that  $\overline{AC} \cong \overline{BC}$  and  $\overline{AD} \cong \overline{BD}$ , and  $\overline{CD} \cong \overline{CD}$  because it is the same segment in both triangles.”

$$\overline{AD} \cong \overline{BD}$$

$$\overline{AC} \cong \overline{BC}$$

$$\overline{CD} \cong \overline{CD}$$

$$\triangle ADC \cong \triangle BDC$$

$$\angle ACD \cong \angle BCD$$

$\overline{CD}$  is the bisector  
of  $\angle ACB$

# PROOF DEVELOPMENT: BACKWARDS DESIGN

## EXAMPLE

**Given:** Dart  $ADBC$  with  $\overline{AC} \cong \overline{BC}$ ,  $\overline{AD} \cong \overline{BD}$

**Show:**  $\overline{CD}$  bisects  $\angle ACB$
